Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Elementary Arithmetic In the preparation of this series of arithmetics the aims have been: First - To secure a high degree of facility in the fundamental operations and in those other processes which, in the actual business of life, are reduced to purely mechanical forms of computation. Second - To cultivate in pupils the habit of forming vivid mental pictures of the business transactions introduced in the exercises, and of the commercial and industrial relations of the numbers involved in the problems. Third - To make a clear and rational development of the theory of numbers as far as is necessary for intelligent arithmetical work. Fourth - To grade the work up, from the simple and easy to the more complex and difficult, by steps so gradual and in an order so logical, that the pupil will steadily grow in mathematical power and take pleasure in his own progress. In pursuance of the aims herein outlined, care has been taken to dwell upon each new process until the child has acquired a considerable degree of skill in it. Then it has not been permitted to drop out of sight and memory, but has been kept fresh by continuous and systematic review. The problems of play, of trade, and of industry deal with things and transactions that are within the experience or knowledge of the child and appeal to his interest. The numbers used in problems are not so large as to cause fatigue, discouragement, or waste of time. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
