HIGH SCHOOL ALGEBRA: ELEMENTARY COURSE (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from High School Algebra: Elementary Course In writing the First Principles of Algebra the authors have had constantly before them two chief aims: (1) To provide a gradual and natural introduction to the symbols and processes of algebra. (2) To give vital purpose to the study of algebra by using it to do interesting and valuable things. Each of these aims leads to the same order of topics, which, however, differs somewhat from the conventional order. If it is admitted that there should be a gradually increasing complexity of forms-to be manipulated it follows that factoring and complicated work in fractions have no proper place in the first half year. This book is arranged so that factoring may begin with the second semester and complicated fractions may come still later. Simple fractions are treated in Chapter V. The pupil is introduced to the algebraic notation by recalling and stating in terms of letters certain rules of arithmetic with which he is already familiar. The simplicity of the algebraic formulas, compared with the arithmetical statement of rules known to the pupil, cannot fail to impress him with the usefulness and power of the subject which he is about to study. This impression will be deepened when, in Chapter VI, rules which caused considerable trouble in arithmetic are derived with the utmost ease by algebraic processes. The study of equations and their uses is naturally the main topic of the Elementary Course. This topic is therefore developed early, simple simultaneous equations being completed in Part One, which is intended to be covered in the first half year. About the Publisher Forgotten Books publishes hundreds of thousands of rare...
