Brand New Book ***** Print on Demand *****.Excerpt from **Elementary Arithmetic: With Brief Notices of Its History** It has been remarked, that one of the most important, and yet one of the most neglected branches of every science, is its history. The following brief notices of the history of the science of number make no pretence to completeness. If they invest the subject with interest to the mind of the intelligent student, and lead him to further inquiries, the object of the writer will have been answered. In what age of the world the science of number had its origin - who first devised the method of counting by tens - who first invented symbols of notation, and separated the idea of number from the qualities of objects with which it was associated, are questions more easily proposed than answered satisfactorily. It is highly probable that the origin of number was coeval with the origin of spoken language, and that, long before figures were invented, some rude methods of reckoning were devised, at first limited, but afterwards extended and improved as the wants and necessities of human society increased. The classifying by pairs would seem to suggest the simplest mode of reckoning. The counting by fives was probably the next step in numeration, and the practice of numbering by the five fingers on the two hands was the origin of counting by tens, as almost all children may be observed to do in their first efforts in counting. In the oldest writings which have been preserved to modern times, there is found a full recognition of this principle of counting by tens, tens of tens, tens of hundreds, and so on. Language still betrays...
