Reviews

*An exceptional ebook and also the typeface applied was intriguing to read through. I have got read and i also am sure that i am going to likely to go through yet again once more in the foreseeable future. I discovered this pdf from my dad and i advised this ebook to find out.

Not illustrated. 1920 Excerpt: . . . and potash-only plots the plants, which had all been dwarfed and were 10 inches or less in height, had been less injured by the frost than on the others. In order to give the second crop an even start on all the plots they were mowed June 16, and the clippings were raked off without weighing-The flood prevented cutting the second crop and a large proportion of plants died before August, the killing being very uneven and independent of the fertilization. Q Timothy, red clover, and redtop. --Hay from these plots was cut on August. 7, the timothy being ripe at the time. There was a fair stand of clover on all, but the plants were small and redtop formed only a small part of the crop. The yields reported in Table XXXI show the marked effect of phosphate whether supplied as acid phosphate or in manure. Neither potash nor the second application of phosphate exerted a distinct effect. Throughout the season no difference was seen between the potash plots and the adjacent unfertilized ones. TABLE XXXI YIELDS PER ACRE OF HAY FROM MIXTURE OF CLOVER, TIMOTHY, AND REDTOP, 1919 Series Treatment in 1918 East plot West plot Average Increase Pounds Pounds Pounds I None. 2, 300 3, 380 2, 840. . . . II Potash...
